Table of contents

Other Settings

A full list of preferences and their possible values can be found in the Posit Workbench Administration Guide. Ensure that you reference the version of the guide that matches your version of RStudio Desktop Pro, as options can change between versions.

The `~/.config/rstudio` and `/etc/rstudio/` folders (or Windows equivalent as described above) contain several subfolders which can be used to install per-user content and/or system-wide defaults.

Folder	Contents
themes	`.rstheme` files defining additional editor color schemes
keybindings	`.json` files defining custom keybindings
snippets	`.snippets` files defining editor snippets
templates	Default template content for new files created in RStudio
dictionaries	Additional dictionaries and languages for spell-checking

More information on each of these folders and their contents can be found in the RStudio Workbench Administration Guide.
